Circular 66 of 2014: Benefit definition Liver transplant

The Council for Medical Schemes (CMS) commenced a process in 2010 to better define PMB benefits through the development of explicit benefit definitions (BD) for PMB conditions as prescribed in the PMB regulations.

As a continuation of that process, the CMS has developed a [benefit definition for Liver transplant](#). The liver transplant draft benefit definition was published in 2012 for comment. This benefit definition incorporates comments from stakeholders and is available on the CMS website.
