Code	Diagnosis	Treatment	CMS PMB ICD-10 Coding

- 1. Annexure A of the General Regulations made in terms of the Medical Schemes Act, 131 of 1998 provides a schedule of "diagnosis and treatment pairs", which cumulatively comprise the prescribed minimum benefits (PMBs) to be provided to beneficiaries of medical schemes in terms of section 29(1)(o) of the Act.
- 2. The attached ICD10 codes represent the Council for Medical Schemes' interpretation of the "diagnosis" portion of these PMBs.
- 3. In the event of conflict between this interpretation and the definition of conditions set out in Annexure A to the regulations, the definition of conditions contained in the regulations will prevail.
- 4. In this schedule:
- a. where only the primary code in the form of a dagger code has been used, all asterisk codes listed under that specific code as per the ICD-10 set of books form part of the PMB diagnosis;
- b. where a dagger code has been used in conjunction with specific asterisk codes, omitted asterisk codes relevant to that dagger code do not form part of the PMB diagnosis.
- The ICD-10 codes have been coded up to the 4th character. A draft document containing 5th character codes where applicable, will be released for comments within the next month. After due

				ument containing 5th character codes where applicable, will be released for comments within the next month. After
				lude the PMB coding process.
