The soon to be announced demarcation regulations increased the urgency for the medical schemes industry to widen the net of coverage to allow a bigger group of people, who can currently not afford premiums, to enjoy medical scheme cover. Join the CMS in an open discussion towards developing a low cost benefit option framework which will provide affordable coverage to a much wider group of people.

*This initial engagement with industry will be followed up with another session in Gauteng later in the year, once the framework has been drafted.
